## **Anomalous Uses of Mass Spectrometers at NASA**

---

Kathleen B. Loftin, Ph.D

Deputy Center Chief Technologist, NASA Kennedy Space Center

At the Harsh Environment Mass Spectrometer workshop we focus on bringing the Mass spectrometer to the sample because it's not practical to bring the samples back to the laboratories. However there are many NASA mass spectrometer applications where we bring the samples to the instrument. This presentation will discuss some of those applications that are ripe for innovative instrument development
